FALL 1930

THE FOSS HEATON GLAD GARDENS

CRESTON, IOWA

Our twenty-two acres of Glads were grown at our new location near Creston, Iowa, with the same kind of soil as at Shannon City, Iowa, our old location, a black clay loam containing all the elements of plant food needed for the natural development of the bulb, with no sand, no irrigation, and no fertilizers. This part of Iowa received enough rainfall to keep the Glads growing, although it was hot. Several inches of rain in September assured a nice crop of peppy bulbs, which are unusually high crowned.

Our new hollow-tile bulb house, 80 feet by 32 feet and full cement basement, assures the proper care of the crop of bulbs.

Practically all sizes of bulbs were sold out last season above No. 6 size, except in a few rare varieties, assuring a crop of bulbs that are young and vigorous.

Corrosive sublimate and new ground are always used for every bulb. All bulbs offered for sale are grown by us.

All shipments prepaid.

All stock is true to name. Rogues are very scarce in our fields. Where they do not prove true we will gladly replace.

We will not make substitutions of size or variety contrary to your wishes.

We shall be glad to hold for Spring delivery, if you prefer, having splendid storage facilities. Orders for Fall delivery will be shipped between November 20 and December 10.

Terms: Cash with order. A deposit of 25 percent will hold your bulbs for later delivery, at which time they will be sent C. O. D. for the balance. All offers made subject to prior sale. 6 at dozen rate, 25 at 100 rate, 1000 at 9 times 100 rate, 250 at 1000 rate.

There is a loss where an order is less than \$1.00.

Special quotations on request. On orders of \$5.00 to \$15.00 five percent discount in cash or extra bulbs. \$15.00 or over, 10 percent.

The 1931 Glad Guide will be mailed to you in January, listing most of these varieties, and containing full cultural directions and much Glad information.
